

Dakota Project 2011

**A camp without a workshop is like a fish without water,
a circus without a clown, a poet without pain,
a pig without mud, or a preacher without a point.**

We are pleased to announce the Dakota Project for 2011 to raise funds for a new **WORKSHOP** for Musana Camps of New Hope Uganda! Still in its infant stages, the camp is in great need of a proper workshop that will provide much needed construction storage facilities, as well as workspace for welding, carpentry, vehicle & equipment maintenance, and more.

The proposed building is a 40'x60' steel and concrete structure (see the drawing below) that will serve as the initial building for the maintenance/construction facility.

The goal is to raise **\$30,000** for this project, which will significantly impact on-going facility and site development projects at the camp. Your contribution will further enable the camp to bring the Fatherhood of God to the fatherless children of Uganda as well as many other brothers and sisters in Christ who will be blessed to use the camp facilities.
