

NEWHOPEUGANDA

Thank you for your interest in supporting Hope Family, our ministry to vulnerable or abandoned babies and toddlers! This is the information we provide to potential sponsors, please read it to be sure you understand what this program involves.

Hope Family has two main components:

First, our goal is always to keep these little ones living with biological family members, if that is possible and safe for the child. We provide support to the family through formula and medical checkups, helping them keep their baby or toddler strong and healthy! Our social worker is also available to help the family know how best to care for their child.

Second, we must sometimes find another place to care for these babies or toddlers. For this we have a home and staff onsite specifically for these little ones. For those who come in, the goal is still to eventually reunite them with biological family and hopefully transition the child back to their care. When that is not possible, we look for foster or adoptive families here in Uganda.

Your donations towards Hope Family help with both vital segments of this ministry! Because of the turnover of children joining and leaving the program, we do not sponsor individual babies or toddlers but rather the Hope Family ministry as a whole. Please feel free to give as you feel led, any amount is welcome!

In addition to financial support, we greatly appreciate your prayer support! As a monthly sponsor of Hope Family, you will receive a newsletter a few times a year with updates about the babies and toddlers in our care.

Please feel free to contact us at sponsors@newhopeuganda.org for answers to any questions you have about this program!
